BRIC-Link III

From the manufacturer that built radio engineers' favorite cost-effective, ultra-reliable IP audio codec and with over 10,000 BRIC-Links in circulation around the world, Comrex is proud to present the latest model in the popular codec line: BRIC-Link 3

Perfect for home studios, stadiums, STLs & more - this broadcast codec packs a powerful punch as a rock-solid IP solution for live audio that you can trust to do its job. Plus, with a suite of reliability tools carefully refined by Comrex for over a decade, BRIC-Link III can excel in 24/7 environments and mission-critical applications where others just can't.

#BL3 - beautifully boring, in the best way possible

COMREX
BROADCAST RELIABLE

BRIC-Link III

Reliability
- CrossLock VPN for ultra-reliable transmission over even marginal IP networks
- Ideal for studio-transmitter links (STLs) and other mission-critical applications
- HotSwap to set a cellular backup network (requires a Comrex Connect Modem)

Configuration/Control
- HTML5-based user interface
- Optional Windows-based application, Codec Commander
- Enhanced front-panel for triggering contact closures & auto-connections

About the Audio
- AAC, HE-AAC, HE-AACv2, Opus, Linear PCM, FLAC, G.722 and G.711 encoders
- Low delay: less than 25 mS in linear modes & less than 30 mS in FLAC modes

Compatibility
- Works with all Comrex ACCESS & BRIC-Link models, both current and retired
- EBU 3326/SIP Mode for third-party IP audio codec interoperability
- Compatible with Gagl, a remote audio contribution service offered by Comrex

Other Sweet Perks
- Free firmware updates
- One year manufacturer's warranty
- Top-notch tech support (available in English & Spanish) - also free of charge
- 100% designed & built in the USA at our manufacturing facility in Devens, Mass.

Optional Add-Ons
- SwitchBoard for easy connections between other Comrex IP audio codecs
- Fleet Commander for controlling your Comrex fleet (Windows application)
- BRIC-Link III Dual Rack Kit for housing x2 BRIC-Link IIIs in a single 1RU shelf
- Comrex Connect Modem for HotSwap (secondary network cellular backup)
- Gagl service to turn your codec into an audio hub for up to 5 remote guests
